

OpenCritic analysis

This project scrapes 10,000 video game reviews from OpenCritic.com to analyze patterns in critical reception. It uses Selenium for web scraping, pandas for data cleaning, matplotlib for visualization, and scikit-learn for modeling.

Data Collection

- Data collection starts at opencritic.com/browse/all
- 500 index pages are scraped
- 10,000 item pages are scraped
- From the index pages: rank, url, genre(s), release date
- From the item pages: name, top critic average, critics recommend percentage, creator(s), platform(s), number of reviews
- Stored as a JSON Lines file

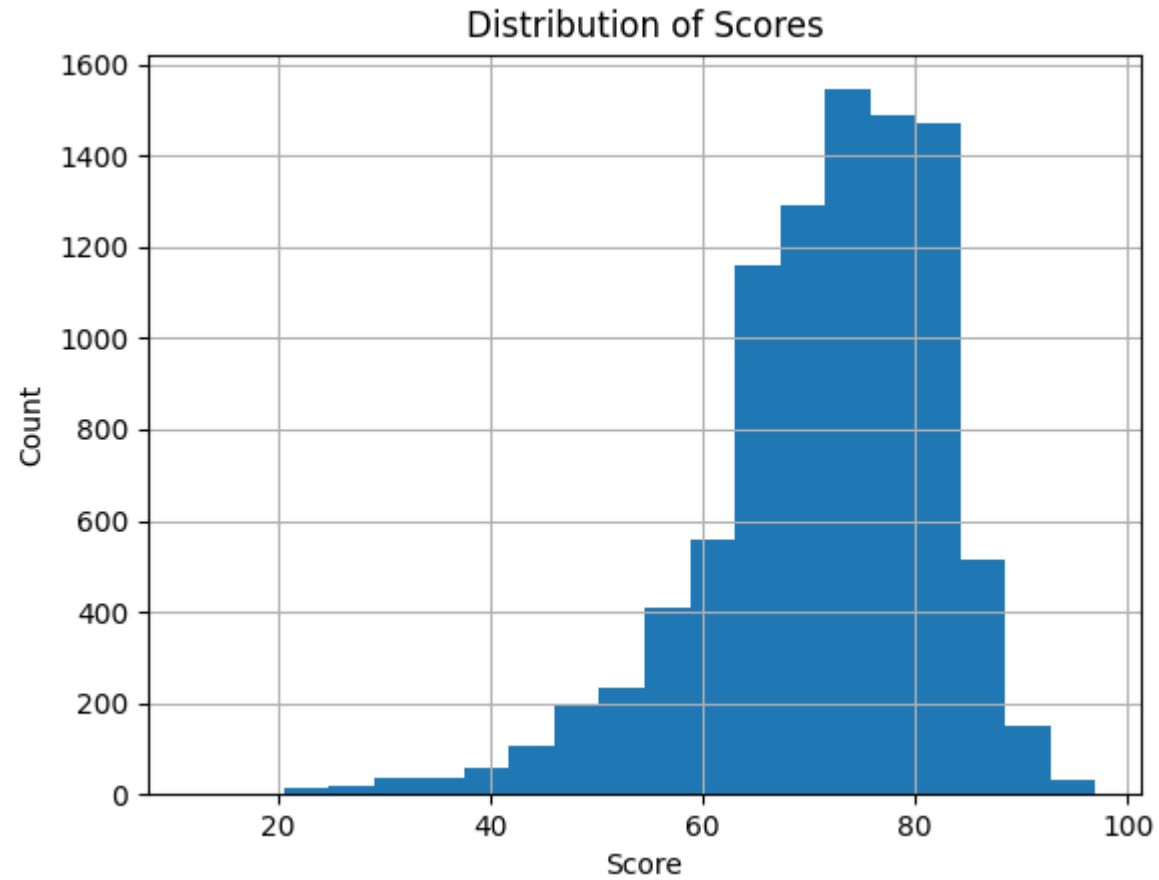

Data Description

- Final cleaned dataset: 9,317 games with a valid top critic average
- 10 features per game
- Top critic average (0-100)
- Critics recommend percentage (0-100%)
- Number of reviews (3-255)
- Creator(s) (5,855 unique studios/developers)
- Platform(s) (14 platforms)
- Genre(s) (23 distinct genres)

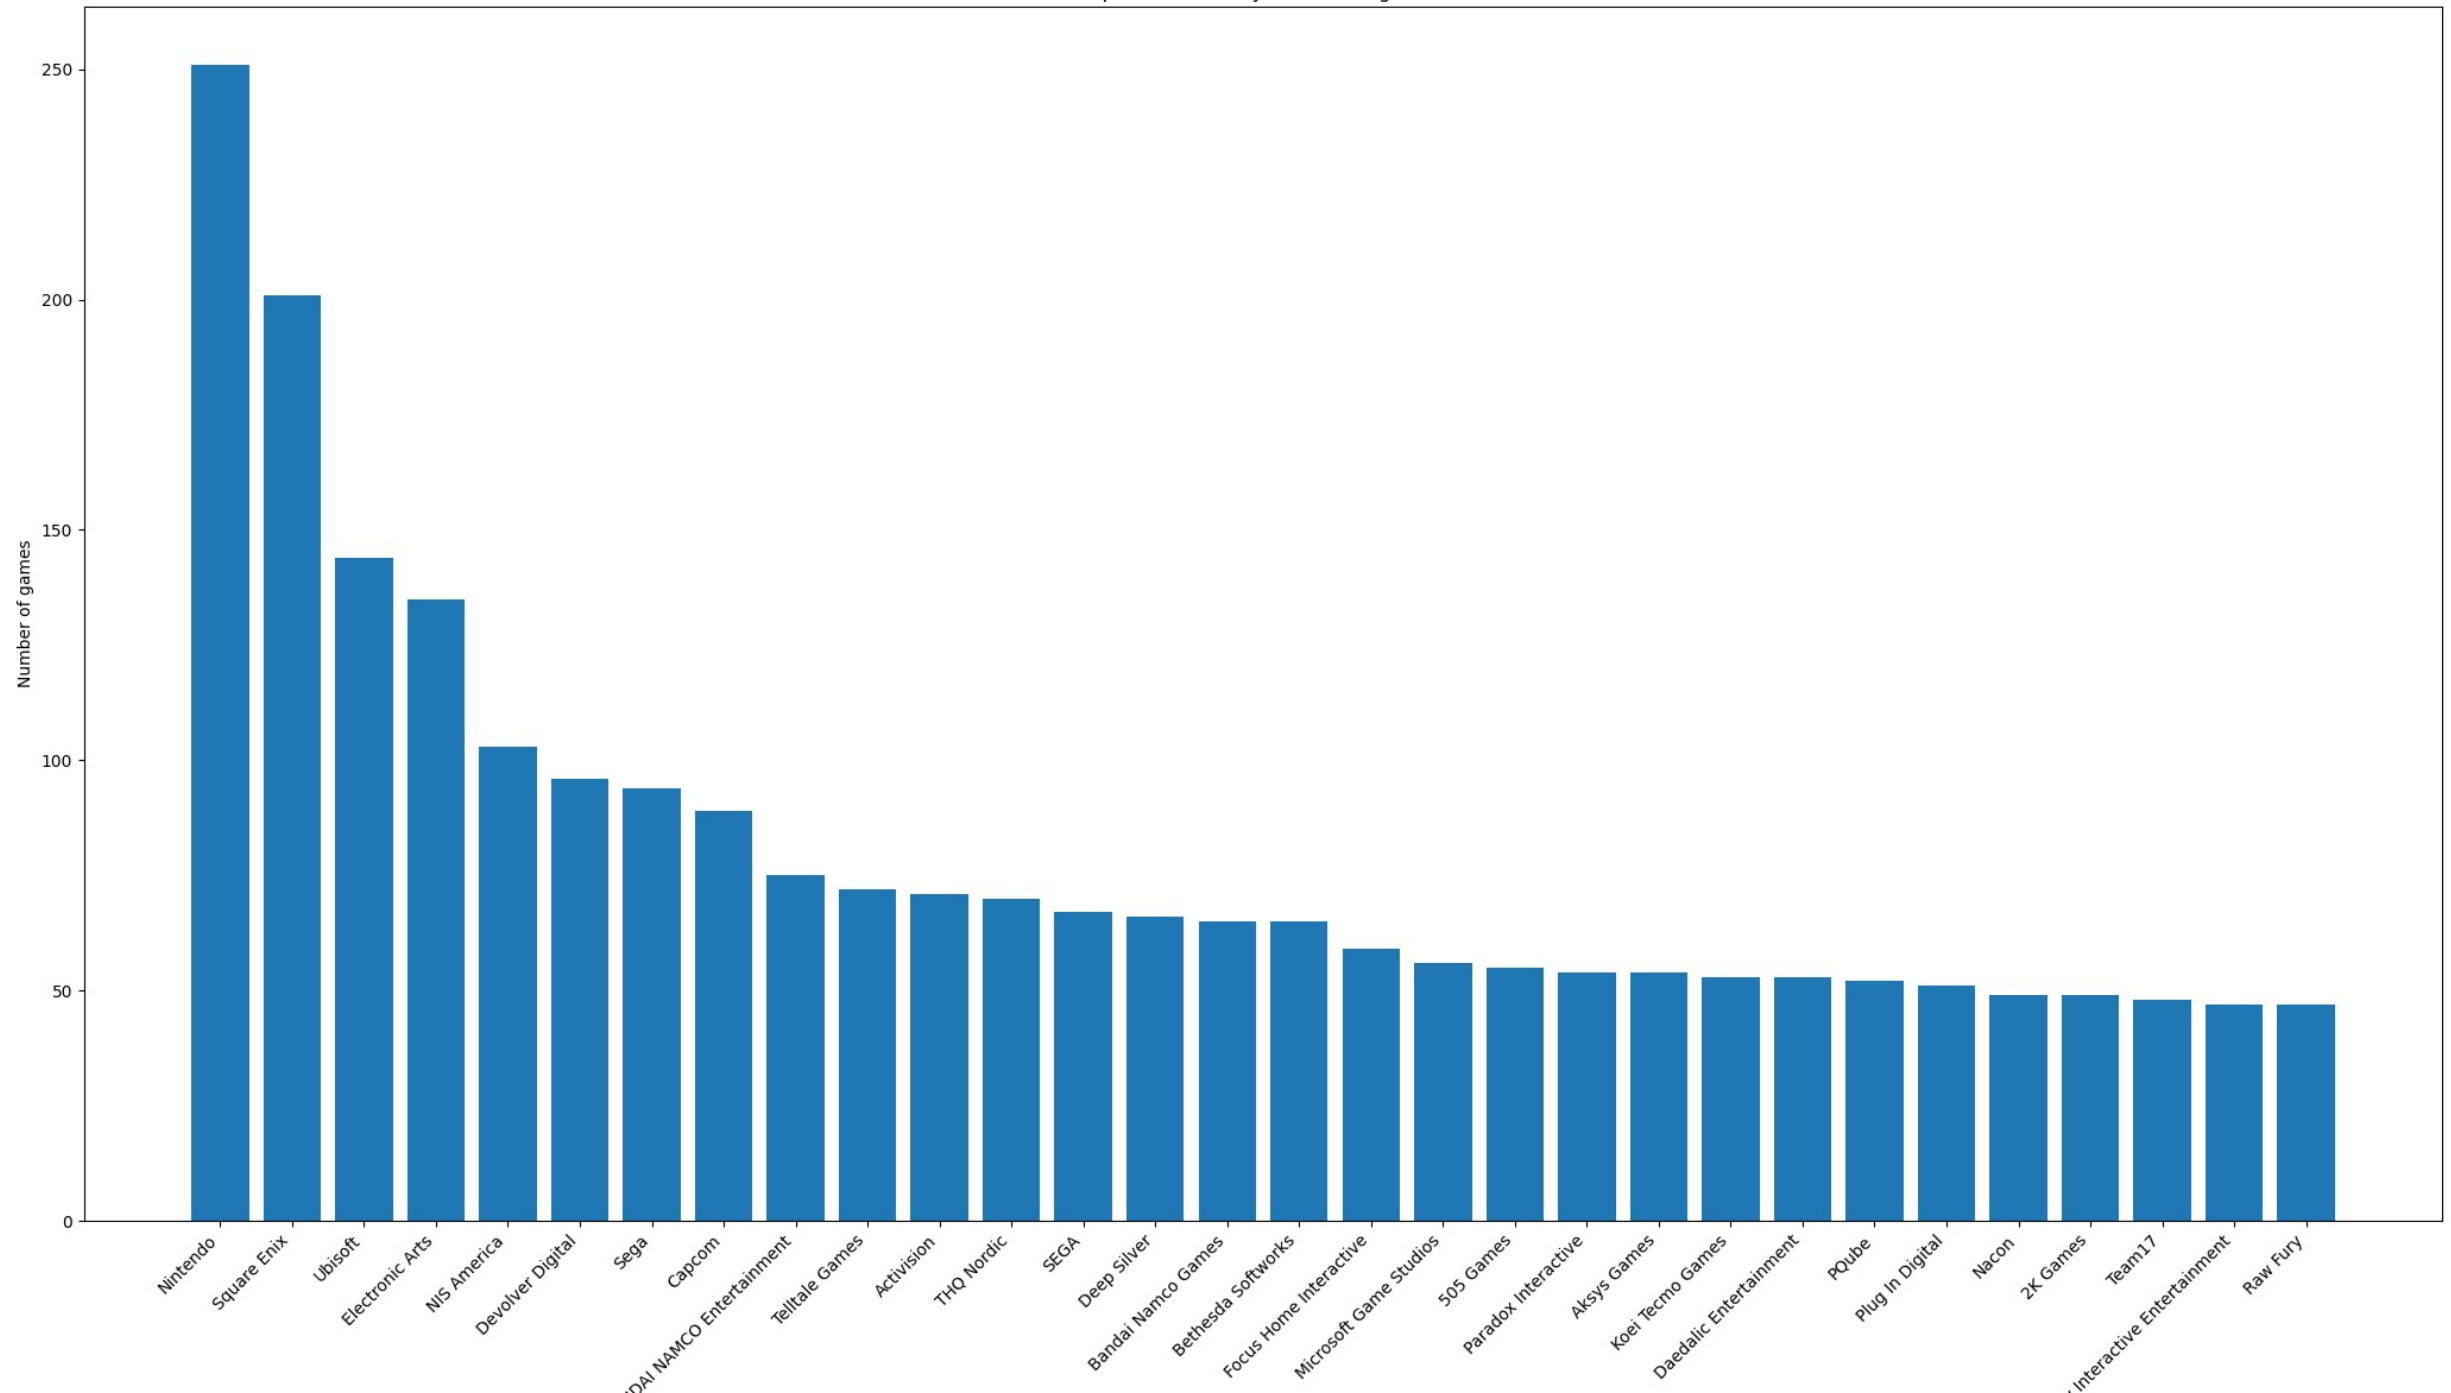

Key Statistics

- Average top critic score: 71.28
- Highest: Super Mario Odyssey (93)
- Lowest: The Day Before (12)
- Most common platform: PC
- Most common genres: Action, Adventure
- Most prolific creator: Nintendo

Modeling

- Only had time for a few linear regression models
- Top critic average variance explained by number of reviews: 8%
- Variance explained by release year: 1%
- Variance explained by critic recommend percentage: 74%
- Variance explained by all 3 of these, using multiple linear regression model: 75%
